

ada Fellowship

Future skills for professionals

Marco Leppin

participated in the ada Fellowship program 2020 – a 12-month future-skills program for key employees of leading companies from all sectors as well as public institutions. The ada fellows have gained a basic understanding of key technological trends and the fundamental technical concepts behind them. They have been trained in new working methods and enhanced their digital leadership skills. They can transfer this skillset to their day-to-day work and are equipped to successfully lead innovative projects in the digital age.
